Death of John T. Lyon.

John T. Lyon, died this morning at one o'clock, of nervous prostration, aged 32 years. He was all his life a resident of this village, and his genial manners made for him many friends, who deeply sympathised with him in his recent troubles.

He had been in a low state of health for several days and those who knew of his condition will not be surprised to learn of his death.

He leaves a widow, and a large circle of other relatives in this county.

He was a member of Upper Long Cane church, for many years and his body will be taken there where his father and mother

steen. Mr. Lyon was noted for his kindness of heart, and especially for the child-like devotion which he evinced for his aged mother, who was sorely afflicted during the last years of her life.

Kind and gentle in disposition, he was one of the most devoted husbands that ever lived amongst us.

Thumb Cut Off.

Last Monday, while the workmen were fitting some of the heavy machinery at the off mill, a chain broke, letting about 3,000 or 4,000 pounds of iron fell about five or six inch-4,000 pounds of iron is ill about it we or six incies. The tackle in falling, struck the finger of one man, slightly hurting him. Dennis Harris, a colored man, had his thomb under the iron at the time, and it was cut off smooth with the hand. He went immediately to 1er. Harrison and had the wound dressed. Dennis Harris is the man whose business it was to trim heages and flower gardens in town, and the loss of his thumb will be a serious cone to him.

Dr. J. L. Miller of Due West is now lying fil of what is supposed to be a fatal ailment. MR. G. G. DAWSON says that he sold cotton

MR. G. G. Dawson says that he soid cotton seed at Lowndesville about two weeks ago, for twenty-seven cents—the seed being measured in a hamper basket, which he says held two bushels. He says from the the looks of the basket, that he was satisfied with the measurement. Thirty pounds is the standard bushel, but in some markets, we learn, that the bushel is estimated at thirty-two pounds and in others at 33% pounds. In some countries, we have heard it said, they measure miles with a coon skin and throw in the length of the tail.

The Sixth Annual Session of Ferguson Academy, under Rev. E. W. Williams and wife, began October 1st, with a full corps of competent teachers, in the new building. At the opening the school is larger this year than ever before, there being 48 day pupils and 19 doarding or resident students. This school is thoroughly guaded and in all the departments the most efficient and practical work is done. All the students are required to work at least one hour every day.

All the students are required to work at least one hour every day.

Hox. J. N. King paid a pleasant visit to this office recently. He is an enthusiastic public-spirited citizen. He gold his cation seed to the oil mill at Ninety-Six for five cents a bushed less than the trust was paying for them. He says that the stockholders speak of making bagging during the summer months, after the cotion seed has been made into oil. Captain King is a statuch supporter of the country newspapers.

MR. Albert Allen has gone off to get into business. Every one is sorry to loose Mr. Albert For four years he has been one of the most popular clerks in W. Juel smith's store, He is a thorough business man and will find no trouble in getting into business. Our best wishes attend him.

Buttnere is another view—another lesson drawn from the four farms of Hail county under the auctioneer's hammer.

In the balmy sunshine of spring the farmers begin to prepare for a bountful yield at the harvest. He needs a little money to buy supplies and stock. This is likely to be a good yerr, he thinks, and hence he doubles his force and acreage. So sanguine, he hesitates not to sign a mortgage. When the season is half advanced he finds that his wants have wonderfully increased, and the fall amount is already exhausted. A drought comes, the seasons are not right, insects and a thousand other causes operate to blight the magnificent prospects. Pay-day finds the poor man unprpared, and the farm—the home must go. He looks upon the wife and the children, and as he sees them leave the old inone, which represents long years of patient toil, he remembers how the family struggled, how they denied themselves luxuries, how they saved and shifted and turned to pay for that home. He remembers the sweet satisfaction—the feeling of independence, the noble pride which filled the hearts of all when the last dollar was paid and he became undispoted owner of that farm. It is no wonder that

In a Hall County (Ga.) newspaper we find this simple statement under the column of "Sheriff Sales," which has a word of meaning. The following property was sold at the Court House by Sheriff Mundy, Tuesday morning.

Lames McKown's farm of 325 acres, known as the Blackstock place, sold to the American Frechold Land Mortgage Company, of London, for \$830.

We have in in this country far more land than money, and our people seem never backward when an opportantly offers to convert acrs into dollars.

When a settler moves into acommunity and buys a tract of land with the intention of of becoming a citizen, whether he be native a vast difference between the two cases. This land which the sheriff sold was bought by men who have no interest in our governament, no care for our social, intellectual or moral advancement. They buy our lands which they let to such tenants upon such terms as will insure the greatest returns. Now, we contend that it is bhe duty of Congress to protect this country from alien landiords. We are forging fetters which will one day bind us hand and foot.
